

# DR Design and Audit Training

Service Data Sheet

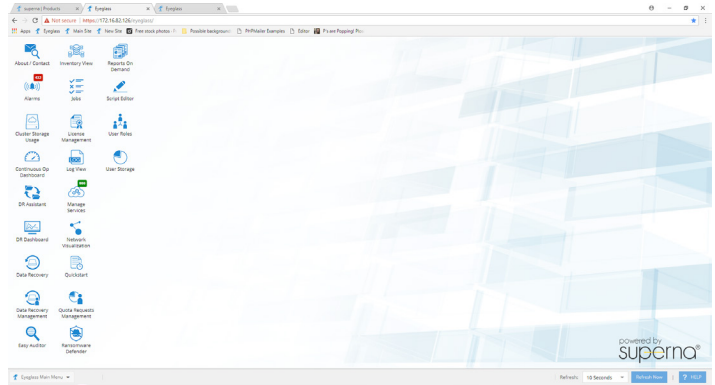

## Superna Eyeglass® DR Event Audit Planning & Failover training Service Description

### Ordered with part Eyeglass-P012 quantity 1 for 2 clusters

This service is designed to assist a customer with a scheduled DR failover, by providing an audit checklist of best practices and execution plan and preparation. In addition, customers receive hands on failover & recovery training procedures and an overall assessment of their environment including applications, DNS, AD, Ision, Eyeglass configuration.

### Key Features

- Yearly audit ensures best practices are maintained
- Get DR Readiness Certified
- Get staff trained with hands on DR walk through
- Leverage our experience with over 10 years of File & Block storage DR testing
- DR Design based on 1000's of testing hours on Windows and Linux failover solutions
