

Proof of Concept Service Data Sheet

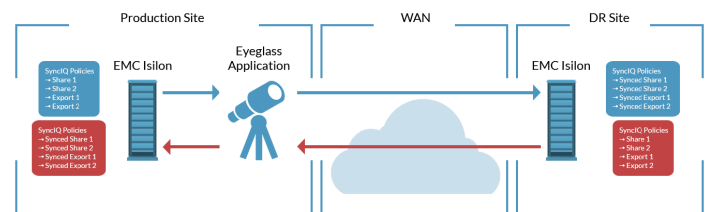

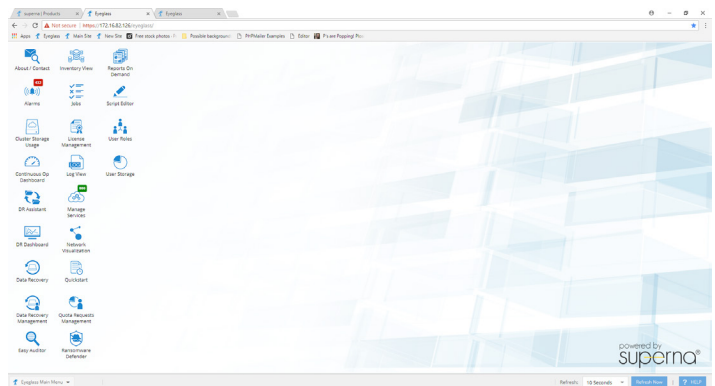

Superna DR Services ensures your data is ready for any Disaster

Testing DR solutions can be a challenge with production equipment and limited access to AD, DNS, hosts and clusters

Key Features

- Leverage our **experience** with over 10 years of File & Block storage DR testing
- Detailed End to end test plan simplifies superna eyeglass technology evaluation
- Use Superna Data Center remotely to execute test plan with Windows, Linux, Vmware hosts, AD and DNS with **full administration access**
- Test scenarios that are **not possible in your own IT environment** (cluster failure tests, AD failure, DNS failure, vmware host failure, Windows and Linux OS failures, WAN latency simulation)
- Rapid scenario setup, retest and **NO RISK** to your production environment
